

## You said

### More development

- Have a SIG structure
- Offer testing training
- Need clearer benefits for BAS accreditations and widen scheme. If a whole centre, as opposed to a chosen programme, could be inspected then I may view this differently. Currently, though, this would take up resource for not that much reward (given we already have a clear focus on quality and development).
- Perhaps lead on how teaching needs to adapt to technology/online learning given the 'digital native' status of prospective students

### More collaboration

- Expensive. Not enough for members on a budget. Could benefit from live feed/webcast online
- Value webinars
- Consider one day tickets as not everyone can afford time away from dependants
- Voting at AGM not as inclusive
- People in exec positions too long
- AGM is better when tied to an event
- What I find unusual is that a person who is not a BALEAP member can access the website. As a self-paying member it implies that even if I don't attend the conferences I can still have access to conference slides etc.

### More inclusivity

- Hear more from the exec
- Promote an international profile
- Closer collaboration with HE organisations such as ALDinHE, BAAL, and British Council
- My tutors find this more useful than I do. I would appreciate a small forum for directors to meet and be able to discuss some potentially sensitive issues in an open way.
- Possibly this (reps) should be reviewed. I'm not sure quite what the remit of the institutional rep is and possibly it has changed over the years

## We did

- The testing roadshow was established
- A BAS review is in progress to articulate value more explicitly and widen accreditation of a programme as 'representative of courses at the institution'
- We had webinars on TEL and the TEL SIG was established
- The establishment of values will help guide any future decisions, including becoming more political.

- We moved to electronic voting for Officer elections
- We kept the AGM tied to an event and moved online in 2020 to enable non UK members to attend
- We implemented a limit of 6 years/2 consecutive terms in one Officer role
- We piloted a live stream at the BAS conference
- The membership benefits being reviewed in working group
- A membership area being considered as part of the membership working group

- An ordinary member survey before the exec meeting was piloted & future initiatives are planned
- A PIM and conference held outside the UK e.g. CEAPA/BALEAP conference in China 2021.
- We have two BAS accredited institutions outside the UK & looking for more.
- We now have the first exec member based outside the UK - appointed March 2021
- SIG events allow for a more international engagement
- We held joint PIMs with ALDinHE and BAAL SIG
- Exec officer roles linked with others e.g. TAFSIG and Testing Officer linked with UKALTA and BAAL TEASIG
- We have accreditation links as part of MoUs with Eaquals, BAC and Aqueduto
- We are having initial conversations with AULC
- A director's network was established
- Rep guidelines were established and disseminated
